

## VORTEILE

- Lange Lebensdauer und niedrige Gesamtbetriebskosten
- Stabiler Kunststoffrahmen
- Vollständig veraschbar
- Geringer Energieverbrauch
- Geringe Anfangsdruckdifferenz
- Konische Taschen

|                                                   |                                                                                                     |
|---------------------------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Anwendung</b>                                  | Filtration der Zu- und Umluft in Räumen mit Klima-/ Lüftungsanlagen und Vorfiltration in Reinräumen |
| <b>Rahmen</b>                                     | Kunststoff                                                                                          |
| <b>Medium</b>                                     | Glasfaser                                                                                           |
| <b>Abmessungen</b>                                | Frontrahmenabmessungen nach EN 15805                                                                |
| <b>Empfohlene Enddruckdifferenz gem. EN 13053</b> | Anfangsdruckverlust + 100 Pa oder Anfangsdruckverlust x3 (der kleinere Wert wird empfohlen)         |
| <b>Maximaler Volumenstrom</b>                     | 1,25 x Volumenstrom                                                                                 |
| <b>Max. Temperatur (°C)</b>                       | 70°C                                                                                                |
| <b>Relative Luftfeuchtigkeit (max.)</b>           | 100%                                                                                                |
| <b>Einbaumöglichkeit</b>                          | Filterrahmen Typ 4MPS, FastFrame oder Gehäuse FC-HF / FKDA                                          |
